About

We have a two decade of experience in Manufacturing of Coir Products. We have Five production units, with production capacity of 2000M.T, per month. The products manufactured meets international standards of quality.

All products are finished packed and shipped with highest quality standards which reach the clients across the world. Separate teams for every process are key of our success.

Why SBB Exports?

Responsible Coir Manufacturer

- Assuring, we took care of that no Indigenous resources had been wasted and no harm created to the environment during the manufacturing of our coir products.

Rooted Manufacturer

- We are one of the few rooted manufacturers who into exports
- From coconut husk to finished product, we control the whole production process inside our company compounds. So our quality will be unique.

Consistent Quality

- Good quality is our responsibility.
- We maintain stringent quality measures which meets global quality standards.

Consistent Pricing

- We understand the price volatility in the current market. We provide consistent pricing to create long-term relationships.

Coir Pith

Why SBB Coir Pith?

- Responsibly produced coir
